

binderholz HORSE LITTER

Only the best for your horse!

binderholz Horsepellets

binderholz Horsepellets is the intelligent solution for both you and your four-legged friend! This product has been specially optimized for the needs of your horse and is recommended by Dr. Rüdiger Brems, Europe's most famous horse surgeon (www.pferdekllinikwolfesing.de)!

The health and well-being of your horse are paramount. To protect it from respiratory disorders and allergies, binderholz Horsepellets are manufactured to be completely sterile. These pellets are made of wood fiber alone, without any additives, and are therefore a pure natural product. Expanding to their fivefold volume after a few days, they provide the optimum absorptive capacity, providing a comfortable, elastic bedding that is easy on the joints and significantly improves the stable climate.

Our recommendation of base bedding is approximately 8 to 12 bags per box and onwards we suggest 2 to 4 bags per box and week.

Clearing out is quick and easy and the bedding only needs to be renewed occasionally, reducing the amount of manure by 50 percent and saving an enormous amount of time. binderholz Horsepellets are available in 15 kg bags, they can be delivered in conveniently sized volumes and stored outside.

All this makes it the perfect product - not only for horses but for horse owners as well!

binderholz Planing Chips

binderholz Planing Chips is a tried-and-trusted litter produced from spruce! The chips are almost completely free of dust and have the highest absorptive capacity possible with a high litter volume.

Once the litter is spread, it forms a soft, comfortable chip bed that can be cleared out quickly. The soft Planing Chips are the ideal solution for absorbing moisture and odors. Only a small amount of fresh litter is required for re-littering and the volume of manure is reduced. binderholz Planing Chips do not contain pesticides or chemical additives and, because it is a natural product, the litter releases a pleasant smell of fresh wood. The pale color of the spruce chips gives the box a friendly and bright atmosphere.

binderholz Planing Chips are hygienically packed in 23 kg airtight bales and can also be easily and compactly stored outside. The product is ideal for horse owners for whom the well-being of their horse is the highest priority.
