

## binderholz **SOLID WOOD ROOF CONSTRUCTION PANEL**

binderholz' 3-ply solid wood roof construction panel in the format 2.480 x 625 mm offers many advantages in its processing compared to large-format panels. It is characterised by quick installation and easy handling. It can be loaded onto small trucks, flatbed trucks and into estate cars without issue.

### BENEFITS

- Natural alternative to roof construction panels traditionally used
- High stability and load capacity
- Circumferential tongue and groove joint with micro chamfer for trouble-free installation
- Easy handling due to small format

### APPLICATIONS

- Roof construction: Saddle, pent and flat roofs
- Sub-structure for Attika covering
